

# PLASTIC POLLUTION IN MARITIME ENVIROMENTS

What needs to happen in order for you to stop this?!!??

Garbage is being dumped in the ocean

Plastics are becoming part of the ocean. Recycling did not happen.

Plastic is a threat to marine creatures by ingestion and entanglement.

two things may happen:

animals end up dying by entanglement or the chemical ingested.

marine creatures suffer until they go to our food tables.

food chain alters

Marine creatures that ingested plastic are being eaten by humans which causes HEALTH ISSUES.

FINALLY, YOU ARE NOT ONLY HARMING MARINE ANIMALS BUT YOURSELF!!!! PLEASE RECYCLE SAVE OTHER LIVES AND YOURS
